

# Katherine Kemp

Silver Spring, Maryland, USA | +1 (240) 438 0186 | k@therinekemp.com

## EDUCATION

### UNIVERSITY OF MARYLAND

#### BS IN COMPUTER SCIENCE

May 2022 | College Park, MD

#### BS IN MECHANICAL ENGINEERING

May 2022 | College Park, MD

Minor in Innovation and Entrepreneurship

Gemstone Honors College

Banneker/Key Scholar

Dean's List

GPA: 3.96 / 4.0

### UNIVERSIDAD CARLOS III

Jan - Jun 2020 | Leganés, Spain

## LINKS

Personal:// [katherinekemp.com](http://katherinekemp.com)

LinkedIn:// [katherinekemp](https://www.linkedin.com/in/katherinekemp)

GitHub:// [katherinekemp](https://github.com/katherinekemp)

## SKILLS

### LANGUAGES

Python • Java • MATLAB • C/C++

LaTeX • OCaml • PLC Ladder Diagram  
and Sequential Flow Chart

### TOOLS

Excel • Git • OpenCV • Scikit-Learn

## INVOLVEMENT

Tau Beta Pi Engineering Honor Society,  
*Initiation Chair*

Celtic Grace Irish Dance Troupe, *President*

Kappa Theta Pi Professional Fraternity,  
*Director of Standards*

Smith Minors, *Ambassador*

Electronics and Instrumentation, *Teaching  
Fellow*

Pi Tau Sigma Mechanical Engineering  
Honor Society, *Member*

Entrepreneurship, *Teaching Assistant*

FLEXUS: Women in Engineering Living  
and Learning Program, *Member*

## COURSEWORK

Algorithms

Mechatronics

Object-Oriented Programming

Data Science

Discrete Structures and Mathematics

Remote Sensing

## PROJECTS

### PREDICTING STOCK PRICES WITH REDDIT COMMENTS

Nov 2021 – Dec 2021 | College Park, MD

- Scraped data from Reddit using Pushshift API and Yahoo Finance
- Generated linear regression models and visualizations for stock price vs. company mentions on r/wallstreetbets using Pandas, Matplotlib, and SciPy

### TEAM FORMULA

Aug 2017 – May 2021 | College Park, MD

- Awarded Outstanding Gemstone Team Presentation
- Collaborated with a team of 12 to design, implement, and document research in dynamic wireless power transfer
- Manipulated existing MATLAB tools including the Parallel Computing Toolbox and Biot Savart Magnetic Toolbox to simulate an AC magnetic field via motion through a non-uniform DC field
- Employed Amazon Elastic Compute Cloud servers to model and analyze thousands of system configurations and determine which is optimal
- Designed a test rig to determine the correlation between MATLAB simulations and a physical implementation of dynamic wireless power transfer

### MOTORIZED BRIO MAZE LABYRINTH GAME

Nov 2019 – Dec 2019 | College Park, MD

- Installed hobby linkages, high-torque servo motors, an Arduino Uno, and an ADXL345 accelerometer on an existing BRIO board game to allow the game to be played via a wired handheld controller
- Implemented a live 3D rendering of the game board orientation using Processing 3 software

## WORK EXPERIENCE

### MPR ASSOCIATES | CO-OP ENGINEER

Aug 2020 - Jan 2021 | Alexandria, VA

- Automated data analysis of simulated nuclear accident scenarios using Python
- Implemented custom setting selection on Python GUI using Tkinter Toplevel widget
- Automated verification and validation procedures for thermal hydraulics code with end to end tests using Pytest
- Ported thermal hydraulics modeling application from Python 2.7 to Python 3
- Conducted rigorous search of industry data to determine failure rate of industrial equipment for a reliability analysis of submarine testing processes
- Designed and 3D printed SolidWorks parts for testing before manufacturing
- Checked technical drawings, tolerance analyses, and calculations for validity in compliance with formal QA requirements

### INTEGRAL GROUP | MECHANICAL ENGINEERING INTERN

Jun 2019 – Aug 2019 | Washington, DC

- Calculated HVAC loads using TRACE 700 software to model building conditions
- Designed ductwork and riser diagrams in Revit
- Utilized a ductulator to determine proper duct sizes
- Prepared and maintained equipment schedules in Revit with relevant data and product specifications
- Reviewed submittals and documented inconsistencies
