- Spanish (Intermediate)

WORK EXPERIENCE

CLOSE | CUSTOMER SUPPORT ENGINEER
April 2024 - Present | Remote
- Provide in depth customer support for the Close CRM by answering technical questions on topics including the **Close API**, **webhooks**, **Make.com**, and **Zapier** via **Zendesk** and **Zoom**
- Design customer-facing tools using **React** and **Formik** in **Typescript** so that customers have a self-service solution for common processes not yet built into the Close app
- Add new features to the **Close-Zapier Integration** as requested by customers
- Write scripts in **Python** to help customers with unique data migration and maintenance needs
- Advise developers who are interested in creating their own integration with Close on the most efficient ways to get and post data to the **Close API**
- Review other team members' code contributions on **GitHub** to ensure code quality standards are maintained
- Analyze customer support interactions in **OpenAI** to monitor trends in customer satisfaction
- Maintain and improve technical documentation on developer.close.com and help.close.com
- Lead and take notes for weekly team meetings

AMAZON | SOFTWARE DEVELOPMENT ENGINEER
Oct 2022 - Mar 2024 | San Diego, CA
- Deployed and tested the worldwide expansion of infrastructure for pre-order fulfillment abuse prevention measures in **AWS** projected to save $80M annually
- Modified an existing system design to support multiple languages and conform to GDPR laws for European marketplace launches
- Wrote a custom **JSON** deserializer to flatten complex **Java** objects into a storable format for ML models
- Diagnosed and responded to problems with order processing during Prime Day
- Led an investigation of a high severity issue impacting 11,000 customers during Prime Day in order to avoid further customer impact during peak traffic
- Wrote unit tests and ran manual integration tests in order to ensure proper behavior of new abuse prevention measures on Amazon.com
- Updated dashboards and documentation to monitor and maintain service health
- Implemented custom cache metrics in **CloudWatch** for **AWS Lambda**

STOCK AND FUND SCREENER | FREELANCE SOFTWARE DEVELOPER
Jan 2023 - Aug 2023 | Washington, DC
- Developed a **Python GUI** to trade stocks based on specific metrics using **Yfinance**, **Pandas**, **Tkinter**, **MatplotLib**, and other tools
- Collaborated with clients to design a custom system with their desired features
- Performed quality assurance testing on calculations for technical indicators

MPR ASSOCIATES | CO-OP ENGINEER
Aug 2020 - Jan 2021 | Alexandria, VA
- Automated data analysis of simulated nuclear accident scenarios using **Python**
- Implemented custom setting selection on a **Python GUI** using **Tkinter** widget
- Automated verification and validation procedures for thermal hydraulics code with end-to-end tests using **Pytest**
- Ported a thermal hydraulics modeling application from **Python 2.7** to **Python 3**
